

The Energy Solutions of Withair Chillers Catalogue 2017

Take Control of Your Energy Future !

Withair offers a wide range of clean energy products and solutions to meet the needs of your projects.

Ongoing innovation with cutting-edge products

Over 20 years of experience

Production 100% Made in China

Guaranteed support and spare parts

Support in design

Documentation for incentives

Two-year guarantee

Free training course

About Withair

Withair® is one leading manufacturer in sustainable energy solutions supplying HVACR products & services for cooling, heating, hot water, ventilation, industrial refrigeration and heat recovery that reflect today's demand for sustainable construction, comfortable indoor climate and industrial cooling process application. and specialize in heating & cooling system, air quality system and new energy development and utilization,now it has three factories,manufacturing different kinds of products, and committed to providing the first-class products & system solutions for customers.

At Withair®, our aim is to support the growth, profit, and sustainability goals of our clients by delivering innovative solutions with n x value.we gain a deep understanding of our client's needs and business objectives first and foremost by gaining and leveraging our technical knowledge, innovative thinking, and vast equipment resources. from heating & cooling solutions and air quality management,to energy performance and efficiency determination,Withair® delivers the results.

Withair® operates in a strongly impacting sector in the energy field, and its primary objectives include committing resources to continuous technological research and improvement of production processes, with the aim of streamlining products and raise users' awareness on the actual soundness of ensuing energy savings.

Withair® products & solutions combine utmost efficiency with minimum energy consumption and strict respect of the environment, the idea proved to be a winning one in just a few years, Withair® became the leader in the sector !

Low energy consumption systems

Use of clean energy

Use of environmentally-friendly cooling gases

ZERO direct CO2 emissions in the environment

Heat Recovery Chillers - Economic and environmental protection and energy savings

Whether striving to minimize the operating costs of a facility or reducing the building's carbon footprint, heat recovery from the chilled water system is entirely possible and practical. In applications from hotels to hospitals, casinos or universities, for service water heating to building heating, pool heating or preheating domestic water sources, heat reclaim is not only possible but also potentially a very efficient means to reduce energy costs and consumption.

Buildings are responsible for 40 percent of total energy consumption. Of the energy consumed in commercial buildings, 43 percent is used for space and water heating. If a more efficient means of providing heat could be implemented it would represent a tremendous opportunity to reduce energy consumption in buildings and thus reduce total energy consumption. There is a more efficient means of generating hot water through the application of chiller systems with heat reclaim capabilities. Withair® chillers with heat reclaim capabilities can do just that; produce chilled water controlled to the necessary temperature while generating hot water as a by-product of the chilled water system.

Modular Scroll Compressor Air Cooled Water Chiller with Domestic Hot Water

Modular Scroll Compressor Air Cooled Water Chiller with Domestic Hot Water

— Product Description —

Withair® offers a variety of Air-Cooled Modular Chillers for a wide range of comfort and process cooling applications and also offers complete, factory-assembled scroll liquid chillers that offer ease of installation with wiring and microprocessor controllers providing maximum operating efficiency. Our compact chillers install easily and quickly into most building layouts, making them ideal choices for retrofit or new building designs.

Withair® Air-Cooled Modular Chiller Unit is a kind of central air conditioner which adopts air as the cooling(heating)source and water as cooling(heating) medium. WithAir® offer quiet, reliable, energy efficient equipment. These units incorporate high quality compressors, state-of-the-art coil design, and innovative packaging. As a sort of integrated equipment, it needs no cooling tower,cooling water pump,boiler and correspoding auxiliary parts, which makes the system more simple,saves installation space, convenient maintenance and energy saving, thus it is very suitable for areas that are short of water.several modules can be formed in to a air-cooled chiller module unit by connecting each module's inlet & outlet pipeline in parallel. the whole unit consists of 1~16moduiles and the max.capacity is 3200kW.

Withair® Air-Cooled Modular Chiller Unit can be widely applied to civilian projects and industrial projects,such as hotel, villa,restaurant, hostital, factory,etc,. it is a wise choice for areas fpr areas where water is insufficient or therre are strict limits on noise level and surroudings.

— The Key Advantages Include —

- ECO friendly refrigerant R410A,R407C.
- Built-in hydraulic module for option.
- Intelligent defrost totally.
- Multi self-protection functions, such as: high & low pressure, high temperature, water flow and antifreeze protection.
- Modular networking technology, the operation of individual modules can be coordinated according demand.
- Advanced & world-famous hermetic scroll compressor high-efficiency, low-noise and low-vibration operation.
- Standalone subsystems enable maintenance of individual subsystems without affecting the continued operation of the rest.
- Hydrophilic and corrosion-resistant material ensures adaptability to poor weather.
- Uses advanced hermetic scroll compressor high-efficiency, low-noise, and low-vibration operation.
- Remote monitoring and control features enable the unit' s operational schedule to be set via internet or phone.
- Using modular networking technology, the operation of individual modules can be coordinated according demand.
- Standalone subsystems enable maintenance of individual subsystems without affecting the continued operation of the rest.
- Unique heat exchanger protection technology, increases heat exchange efficiency to 30% above that of conventional heat exchangers.

— Technical Data —

Model		W02C1-68HR	W02C1-90HR	W02C1-102HR	W02C1-136HR	W02C1-200HR	
Nominal cooling capacity		kW	68	90	102	136	200
DHW (domestic hot water)	Heat recovery capacity	kW	21	27	31	41	60
	Entering temperature	°C	50				
	Leaving temperature	°C	55				
Power supply		V/Ph/Hz	380/3/50				
Compressor	Type	Hermetic scroll compressor					
	Brand	Hitachi, Panasonic, Copeland					
	Quantity	4	6	6	6	6	
	Power	kW	22	29.75	33.05	40.6	65.6
Safe protection device		High/low pressure switch, overload protection, counter clock wise and short phase protection (power phases sequence protection), lack water (water-flow switch), anti-freeze protection, ect					
Air side (Condenser)		Type	High efficiency finned tube heat exchanger				
Water side (Evaporator)	Type	High efficiency shell-and-tube heat exchanger					
	Water flow	m³/h	11.7	15.5	17.5	21.4	33.5
	Water pressure drop	kPa	40-60				
	Max. pressure drop	kPa	1.0Mpa				
Dimension	Length	mm	2065	3000	3000	3216	2650
	Width	mm	1030	1030	1030	2156	2050
	Height	mm	1974	1820	2062	2156	2230
Noise		dB(A)	65	67	69	71	73
Refrigerant	Type	R410A					
	Charging rate	kg	3.8×4	6×4	3.8×6	4.5×6	6×7
Net weight		kg	840	1200	1350	1480	2120
A/C side entering/leaving water pipe			DN65	DN65	DN65	DN65	DN80
DHW side entering/leaving water pipe			DN32	DN32	DN32	DN32	DN32

Notes:

- Standard cooling work condition: entering chilled water temperature 12°C, leaving temperature 7°C; dry bulb temperature 35°C, wet bulb temperature 24°C.
- As an optional function, heat recovery for domestic hot water is available, maximum heat recovery rate: 40%.
- Units can realize 1~16 unit's modular connection and control energy-regulation automatically.
- All models, sizes, dimensions, and specifications are subject to change without prior notice, please refer to nameplates for the most accurate specifications

— Delivery & Packaging —

- 100% test before delivering products.
- Products catalogue, installation & operation manual will be sent together.
- Tracking number will be sent to customer as soon as we ship the products.
- Item shipped in 25 working days against payment depends on the quantity.
- Four steps of packages, plastic film, foam, carton and plywood for stable transportation.
- Ocean shipping, railway shipment and air transportation are acceptable according to customer demand.
